- A. Write the domain and range in interval notation.
 - B. Write the maximum and minimum points as ordered pairs and the maximum and minimum values as y-coordinates.
 - C. Write the intervals where the graph is increasing, decreasing, and constant in interval notation.
 - D. Write the intercepts as ordered pairs.
 - E. Write the intervals in interval notation where the graph is positive and negative.
 - F. Write whether the graph has even, odd or no symmetry.
 - G. Write the end behaviors in limit notation. If a limit does not exist, write DNE.
- ***If something is not applicable to the graph, write N/A.
