

## SM2 Quadratic Graphs Test Review

For each equation, fill in at least two boxes in each row AND choose the letter of the graph below the table that matches the equation.

	Direction of Opening	Vertex	y-intercept	Zeros	Letter of Correct Graph
1. $y = (x+2)^2 - 9$					
2. $y = -(x-2)^2 + 9$					
3. $y = -(x-1)(x-5)$					
4. $y = -(x+1)(x+5)$					
5. $y = x^2 - 8x + 7$					
6. $y = x^2 + 8x + 7$					

**For each function, find the vertex and y-intercept of the graph. Show all your work!**

7.  $y = 2(x+3)^2 - 7$

8.  $f(x) = -x^2 + 12x - 33$

9.  $y = \frac{1}{5}(x+8)(x-2)$

Vertex: \_\_\_\_\_

Vertex: \_\_\_\_\_

Vertex: \_\_\_\_\_

y-intercept: \_\_\_\_\_

y-intercept: \_\_\_\_\_

y-intercept: \_\_\_\_\_

**Fill in the requested information. Then graph the function. Plot at least five points!**

10.  $f(x) = x^2 - 6x + 4$

$a = \underline{\hspace{2cm}}$     $b = \underline{\hspace{2cm}}$     $c = \underline{\hspace{2cm}}$

Form: \_\_\_\_\_

Direction of Opening: \_\_\_\_\_

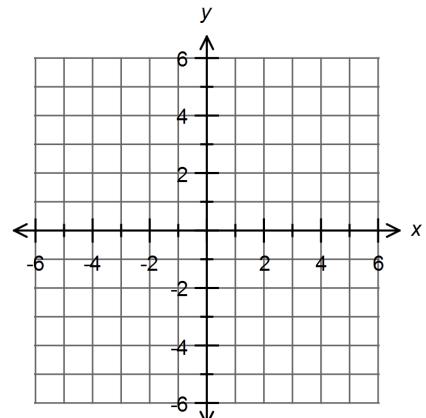

Vertex: \_\_\_\_\_

Axis of Symmetry: \_\_\_\_\_

Is the vertex a maximum or minimum? \_\_\_\_\_

Maximum or minimum value: \_\_\_\_\_

y-intercept: \_\_\_\_\_

$x$	$f(x)$

Vertex

**Show work here:**

11.  $y = -2(x+2)^2 + 5$

$a = \underline{\hspace{2cm}}$   $h = \underline{\hspace{2cm}}$   $k = \underline{\hspace{2cm}}$

Form: \_\_\_\_\_

Direction of Opening: \_\_\_\_\_

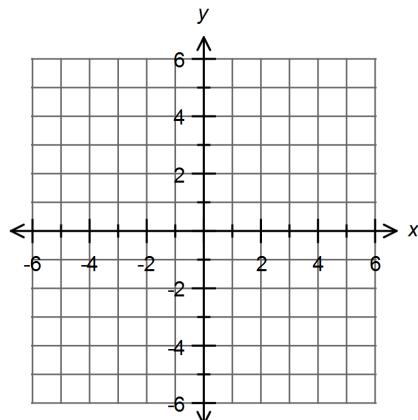

Vertex: \_\_\_\_\_

Axis of Symmetry: \_\_\_\_\_

Is the vertex a maximum or minimum? \_\_\_\_\_

Maximum or minimum value: \_\_\_\_\_

y-intercept: \_\_\_\_\_

$x$	$y$

Vertex

12.  $y = \frac{1}{2}(x-2)(x-6)$

$a = \underline{\hspace{2cm}}$   $p = \underline{\hspace{2cm}}$   $q = \underline{\hspace{2cm}}$

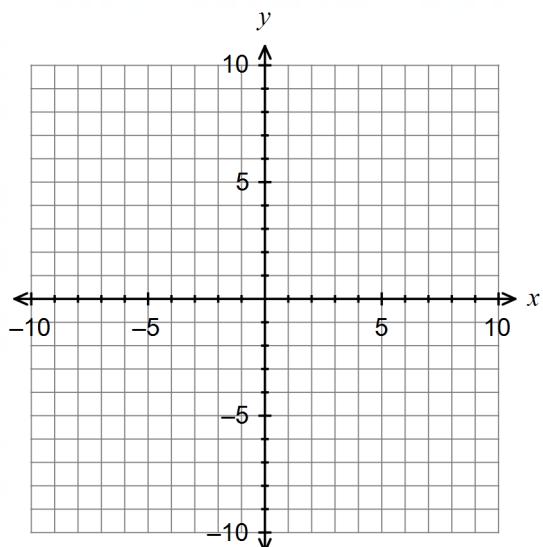

Form: \_\_\_\_\_

Direction of Opening: \_\_\_\_\_

Zeros: \_\_\_\_\_

Vertex: \_\_\_\_\_

y-intercept: \_\_\_\_\_

Show work here:

$x$	$y$

Vertex

**For each function, do the following: 1) state whether the function is in standard, vertex, or factored form, 2) find the zeros ( $x$ -values), 3) state the  $x$ -intercepts (as ordered pairs), and 4) find the  $y$ -intercept (as an ordered pair).**

13.  $f(x) = x^2 - 10x + 21$

Form: \_\_\_\_\_

Zero(s): \_\_\_\_\_

$x$ -intercept(s): \_\_\_\_\_

Show work here:

14.  $y = -6x(x + 7)$

Form: \_\_\_\_\_

Zero(s): \_\_\_\_\_

$x$ -intercept(s): \_\_\_\_\_

Show work here:

15.  $y = 2x^2 - 4x - 34$

Form: \_\_\_\_\_

Zero(s): \_\_\_\_\_

$x$ -intercept(s): \_\_\_\_\_

Show work here:

16.  $f(x) = (x - 2)^2 + 25$

Form: \_\_\_\_\_

Zero(s): \_\_\_\_\_

$x$ -intercept(s): \_\_\_\_\_

Show work here:

## Vocabulary

Write the letter of the definition that best describes each word, phrase, or expression in the appropriate blank. One of the definitions will be used three times!

- |  |  |
|--|--|
| <input type="text"/> Axis of Symmetry (What is it?)        | A. $f(x) = ax^2 + bx + c$ , where $a \neq 0$ .   |
| <input type="text"/> Equation of the Axis of Symmetry      | B. The vertex of a parabola that opens upward is the _____ of the graph.   |
| <input type="text"/> Factored Form of a Quadratic Function | C. The vertical line that divides a parabola in half.  |
| <input type="text"/> Maximum Point                         | D. $f(x) = a(x-h)^2 + k$ , where $a \neq 0$ .  |
| <input type="text"/> Minimum Point                         | E. The vertex of a parabola that opens downward is the _____ of the graph.   |
| <input type="text"/> $\frac{-b}{2a}$                       | F. The set of $x$ -values which make $f(x) = 0$ , indicating where the graph will cross the $x$ -axis.   |
| <input type="text"/> Quadratic Function                    | G. $f(x) = a(x-p)(x-q)$ , where $a \neq 0$ .   |
| <input type="text"/> Roots                                 | H. The point where the parabola changes direction – the “tip” of the parabola. $(h, k)$ from the equation $f(x) = a(x-h)^2 + k$ , where $a \neq 0$ . |
| <input type="text"/> Standard Form of a Quadratic Function | I. $x = \frac{-b}{2a}$ for a quadratic function in standard form or $x = h$ for a quadratic function in vertex form.                                 |
| <input type="text"/> Vertex                                | J. The type of function whose graph is a parabola. It can be written in standard form, vertex form, or factored form.                                |
| <input type="text"/> Vertex Form of a Quadratic Function   | K. This expression gives the $x$ -coordinate of the vertex of a parabola when the equation is written in standard form.                              |
| <input type="text"/> $x$ -Intercepts                       |  |
| <input type="text"/> Zeros                                 |  |
